SKILLS

HTML, CSS, JavaScript, C++

Bootstrap

SQL Databases

Data Structures and Algorithms

Operating Systems Architecture

Linux/Unix Programming

Basics of Networking

Troubleshooting and Debugging Techniques

LANGUAGES

Kannada: Native Proficiency | English

SUMMARY

Dedicated and efficient Front-End Web beginner with 4+ months experience in Certified in F/E and DSA technologies. Seeking to further improve HTML5 and CSS3 skills as the future full stack developer at Atmospheric Solutions.

Motivated student completing BE degree. Experienced in C++ and Embedded environments. Supports team administrative, project coordination, design and programming needs. Fluent in C++ and JS. College projects included building web, optimizing programs and validating code.

EDUCATION

Bachelor of Engineering in Electrical and Electronics
B.M.S. College of Engineering, Bengaluru

Sept 2021
CGPA: 8.2

Relevant Coursework: Usability in Website and Software Design, C++ and C Programming I & II Embedded environments, Web Page Development, Relational Database Design & SQL, Linux/Unix Programming, Operating Systems Architecture, DSA.

CERTIFICATIONS

PrepBytes Full Stack Development Certification

Gained in depth experience by building real world projects.

The Complete JavaScript

practical and fun code examples and beautiful and complete projects.

Data Structure using C and C++

Analyse and Implement Data Structure and Algorithms using C and C++, utilizes coding challenges to reinforce the ideas taught.

Troubleshooting and Debugging Techniques by Google

Analyze real-world IT problems and implement the appropriate strategies to solve those problems. Understand the root cause for problems related to speed, crashes, or exhausted resources in your computer.

PROJECTS

To-do App UI Web and Mobile

connect the HTML pages with CSS files and style the pages, website can work on multiple devices having different screen sizes in pixels. pages with functionality written in JS files, multiple DOM functions which will make static application as Dynamic application

Digital Clock

DOM manipulation. Also added dynamic HTML using JS and Date function of JS.

Guess My Number

this project is to simply guess a secret number which is between one and 20.

Weather Web App

created a Simple Weather Web App using HTML, CSS, Javascript, and openweather API(live weather reports)

two Player Dice game

Created a javascript app that rolls virtual dice with randomness. This javascript dice roller is simple and quick to create
